

GENERAL ORDER

Daily Freedom Login

Date: June 10, 2019

Number: 19.042

Effective Date: June 10, 2019

Expiration Date: N/A

Approved By: Mark S. Ciarrocca, Acting Fire Rescue Chief

Over the course of several weeks, there have been numerous occurrences of units being incorrectly logged into the freedom CAD devices. Accurate status of units in Freedom is essential for the CAD system to operate properly.

The improper status of units can create confusion for communications personnel as well as field staff in regard to response assignments and units which should be due for calls. Therefore, effective immediately, all stations will be responsible for logging out of freedom CAD and logging back into the application during their morning apparatus checks. Personnel should perform this action on all first out apparatus in their stations prior to 0700 hours each day.

Please refer to Informational Bulletin 19.024 for more detailed direction on Freedom device interaction.

If personnel have questions in regard to this general order they can contact Battalion Chief Dale Kidwell.
