

Informational Bulletin

2022 Protocol Medication Box Layout

Date: June 30, 2022

Number: 22.024

Effective Date: June 30, 2022

Expiration Date: N/A

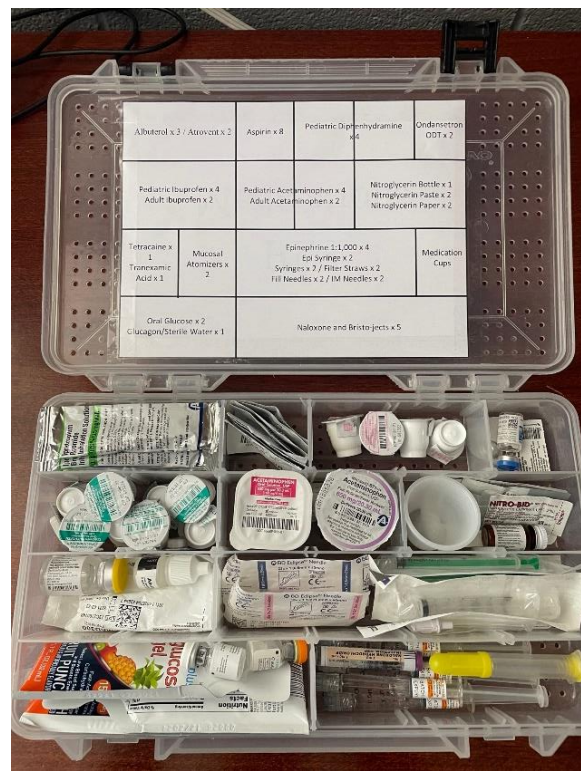

Approved By: Darren L. Stevens, Fire Rescue Chief

With the implementation of the 2022 Protocol changes from GO 22.038, the addition of new medications will require changes to the current medications and subsequent changes to the medication box layouts. The pictures below detail the new layouts, and the diagrams for the box labels can be found on SharePoint under "Forms" - "Safety". FRF 961 is the BLS Med Box Layout and FRF 962 is the ALS Med Box Layout. They are also attached to this IB.

2022 ALS Medication Box:

2022 BLS Medication Box:

After all medications have been placed in the box per the attached diagrams and numbers, all remaining medications from the previous medication boxes shall be replaced in the plastic bag originally received, and marked 'RETURN'. These medications and the Atropine/2-PAM Chloride kits should then be placed in the courier box for pickup and return to the Pharmacy.

Questions regarding this informational bulletin should be directed to Captain Rob Smith.
