

Informational Bulletin

Springs Road Bridge Traffic Changes

Date: September 9, 2022

Number: 22.036

Effective Date: September 9, 2022

Expiration Date: N/A

Approved By: Darren L. Stevens, Fire Rescue Chief

Beginning Tuesday, Sept. 13, drivers on Route 802 (Springs Road) in Culpeper and Fauquier counties should be aware of temporary traffic signals on both sides of the bridge over the Rappahannock River.

Virginia Department of Transportation contractor crews are rehabilitating the structure, which is located between Route 632 (Myers Mill Road) and Route 687 (Opal Road) on the Culpeper/Fauquier County line.

During the construction work, alternating traffic over the bridge will be controlled by a temporary signal. Once the work is complete on one side of the bridge, traffic will shift to the new lane, and the opposite side of the bridge will be rehabilitated.

Drivers should use extreme caution as they travel through the work zone. Crews and equipment will be operating near the travel lane. Congestion and delays are possible, especially during morning and afternoon commuting hours, due to the lane closure.

The project should take about a month to complete, ending on or about October 20, weather permitting. Please see the map below for location.
