Concerns have arisen regarding NOVA Manuals released through the Northern Virginia Emergency Response System (NVERS). While our System has adopted several NOVA manuals, the recently released updated editions have not yet been approved or adopted. They will be making their way through the proper committees, and once approved, will be released with an updated Operating Procedure and General Order.

For the upcoming promotional processes, **only the NOVA Manuals that have been adopted by our System** will be used as material for testing purposes. These are the 200 series of Operating Procedures. You can find these on SharePoint as well as our website, Fauquierfirerescue.org.

For specific resource details and information, please refer to IB 24.007.
