

Informational Bulletin

SCBA Regulator Program

Date: March 16, 2021

Number: 21.018

Effective Date: March 16, 2021

Expiration Date: N/A

Approved By: Darren L. Stevens, Fire Rescue Chief

As you are aware, the department is moving forward with a personal SCBA regulator for all Fauquier Fire Rescue IDLH members. Part of the coordination for the project requires that we collect the current regulators from the existing SCBA units in a “company by company” method.

We will convert one company at a time as we have to received, flow tested, and re-issue to individuals, making our way across the apparatus fleet. So far, ONLY STATION 1105 has been converted to the personal SCBA regulator program.

What this means to you: Until the entire station (Career & Volunteer members) has been transitioned to the new system, please do not remove the regulators currently in place on each SCBA. If you do, this will result in lost and broken regulators that will then result in a delay in the implementation of the complete system.

Lt. Flippo will advise your station officers as each station is transitioned to the new program.

Questions regarding this informational bulletin should be directed to Lieutenant Butch Flippo.
