

Informational Bulletin

SCBA Repair Turnaround

Date: June 1, 2021

Number: 21.031

Effective Date: June 1, 2021

Expiration Date: N/A

Approved By: Darren L. Stevens, Fire Rescue Chief

The Logistics Section is currently experiencing a reduction in staffing due to unforeseen medical leave that is required by one of our members. This impact will affect the turnaround time for the repair of SCBA for the next 2 months at a minimum. During this time we ask for your understanding of the situation and realize that the almost immediate repair and return we have become accustomed to will not be possible. We would also like to suggest that you move the SCBA within your station to accommodate the higher priority apparatus and response if you have SCBA go out of service for any reason. We will make every attempt to receive, repair, and return the apparatus as quickly as possible given the reduced capacity of staff members.

Questions regarding this informational bulletin should be directed to Lieutenant Butch Flippo or Deputy Chief Kurt Kight.
